

MS[®] syringe filters

PVDF PTFE PES MCE NYLON

MS[®] syringe filters are simply quality filters, well packaged, and offered at a fair and competitive price. The Classic range is available in all of the major membranes including **Nylon**, **PTFE**, **PES**, **MCE** and **PVDF** which are supplied in 13mm, 25mm and 33mm formats in virgin polypropylene housings.

Despite the attractive pricing, the emphasis is very much on quality. Membrane materials are supplied by the best names in the industry and the **ISO9000 certified** manufacturing is carried out to the highest standards, in certified clean room conditions, using the latest manufacturing technology to ensure a high quality, consistent product.

MS[®] PVDF Syringe Filter

Picture:

Product Description:

MS[®] Syringe filters are purpose-built with features designed to bring the highest levels of performance and purity to your research. We incorporate a variety of membranes to offer separation and purification solutions for the majority of your laboratory needs.

PVDF (Polyvinylidene fluoride) – extremely low protein-binding; for filtration of non-aggressive aqueous and mild organic solutions, or were maximizing protein recovery is important.

Features and Benefits:

- Good heat-endurance and chemical stability, strong hydrophobicity
- Syringe Filters for Cell Culture provide effective filtration for a wide variety of sample types. They are available in two pore sizes (0.22 μ m and 0.45 μ m)
- All items are quality tests for filter efficacy and housing integrity. The housing is pressure tested for use with up to 75 psig (5.0 bar) of pressure
- Designed with a Female Luer-Lok inlet and Male Luer slip outlets.
- some Filters are individually wrapped sterile, certified RNase-free, DNase-free,
- Non-pyrogenic, and DNA-free.

Technical Specification:

Parameters	13mm	25mm	33mm
Membrane material	PVDF	PVDF	PVDF
Housing material	PP	PP	PP
Filter diameter (mm)	13mm	25mm	33mm
Filtration area (cm ²)	0.65	3.90	4.60
Pore Size(μm)	0.22 0.45	0.22 0.45	0.22 0.45
Holdup volume (μl)	<10	<30	<55
Sample volume (ml)	<12	<100	<140
Maximum Operating Temperature	100°C	100°C	100°C
Maximum Operating Pressure (psi)	50	95	110
Applicable pH value	1-14	1-14	1-14

Application:

- Gas filtration
- Vapor filtration
- High-temperature filtration
- Food industry
- Medicine filtration

Order Information:

Nonsterile with a Female Luer-Lok inlet and Male Luer slip outlets.

MS[®] PES Syringe Filter

Picture:

Product Description:

MS[®] Syringe filters are purpose-built with features designed to bring the highest levels of performance and purity to your research. We incorporate a variety of membranes to offer separation and purification solutions for the majority of your laboratory needs.

PES(Polyethersulfone) – low affinity for proteins and extractable with substantially faster flow rates than PVDF; suitable for pre-filtration and filtration of buffers and culture media.

Tel: +98 – (0) 171 224 5727

Fax: +98 – (0) 171 2229505

E-mail: info@membrane-iran.com

Features and Benefits:

- High filtration speed
- Low exeractables
- Lowest protein binding
- Syringe Filters for Cell Culture provide effective filtration for a wide variety of sample types. They are available in two pore sizes(0.22µm and 0.45µm)
- All items are quality tests for filter efficacy and housing integrity. The housing is pressure tested for use with up 75 psig (5.0 bar) of pressure
- Designed with a Female Luer-Lok inlet and Male Luer slip outlets.
- some Filters are individually wrapped sterile, certified RNase-free, DNase- free,
- Non-pyrogenic, and DNA –free.

Application:

- Sterile filtering protein solution
- Tissue culture media filtration
- Tissue culture additive filtration

MS[®] PTFE Syringe Filter

Picture:

Product Description:

MS[®] Syringe filters are purpose-built with features designed to bring the highest levels of performance and purity to your research. We incorporate a variety of membranes to offer separation and purification solutions for the majority of your laboratory needs.

Features and Benefits:

- Broad chemical compatibility
- Strong chemical stability and inertia
- Strong hydrophobicity
- Syringe Filters for Cell Culture provide effective filtration for a wide variety of sample types. They are available in two pore sizes (0.22 μ m and 0.45 μ m) and four different membrane types.
- All items are quality tests for filter efficacy and housing integrity. The housing is pressure tested for use with up to 75 psig (5.0 bar) of pressure
- Designed with a Female Luer-Lok inlet and Male Luer slip outlets.
- some Filters are individually wrapped sterile, certified RNase-free, Dnase-free,
- Non-pyrogenic, and DNA-free.

Application:

- Organic solvent with strong chemical causticity filtration
- strong acid solvent filtration
- Alkali solvent filtration

MS[®] MCE Syringe Filter

Picture:

Product Description:

MS[®] Syringe filters are purpose-built with features designed to bring the highest levels of performance and purity to your research. We incorporate a variety of membranes to offer separation and purification solutions for the majority of your laboratory needs.

MCE (Mixed Cellulose Ester)-filtration of aqueous solutions; effectively binds trace proteins.

Features and Benefits:

- Uniform aperture
- No medium dropping
- Thin texture
- Little resistance
- High filtration speed
- Little absorption
- Syringe Filters for Cell Culture provide effective filtration for a wide variety of sample types.
- All items are quality tests for filter efficacy and housing integrity. The housing is pressure tested for use with up to 75 psig (5.0 bar) of pressure
- Designed with a Female Luer-Lok inlet and Male Luer slip outlets.
- some Filters are individually wrapped sterile, certified RNase-free, DNase-free,
- Non-pyrogenic, and DNA-free.

MS[®] Nylon Syringe Filter

Picture:

Product Description:

MS[®] Syringe filters are purpose-built with features designed to bring the highest levels of performance and purity to your research. We incorporate a variety of membranes to offer separation and purification solutions for the majority of your laboratory needs.

Nylon-providing a board range of chemical compatibility for the filtration of either aqueous or organic solvents; hydrophobic; can be used in a board pH range.

Features and Benefits:

- Hydrophilic property
- No need to moist beforehand
- Uniform aperture
- Strong tenacity and adsorbability
